

Welcome to **NEURA Robotics**, the innovator of the robotics world. Our goal is to equip collaborative robots with groundbreaking cognitive capabilities to enable safe and intuitive collaboration with humans. Under the leadership of founder David Reger, we have spent the first years of **NEURA Robotics** laying the foundations for humans and robots to work hand in hand.

"We serve humanity" is not just a motto, but our mission. Become part of our ambitious, international company and shape the future of robotics with us.

Welcome to **NEURA Robotics** - where innovation meets team spirit.

Your mission & challenges

- Define test concept and test specifications for sensor systems in robotics according to functional and safety requirements
- Analyze safety norms and state-of-the-art testing approaches to define appropriate test environments and measurement equipment
- Work closely with safety experts, hardware and software developers and architects to ensure that our sensor systems are qualified / fully tested
- Plan and execute data acquisition and validation campaigns for functional testing for Safe Human Detection
- Coordinate work of suppliers for verification / validation

What we can look forward to

- Knowledge in requirements engineering and experience with requirements management tools like DOORS or Polarion
- Experience in test engineering or in general verification / validation of technical systems in robotics, automotive, avionics or similar domains
- Background and development experience in one or several areas of HW or SW development, esp. in real-time or safety-critical systems is a plus
- Knowledge in (technical) project management is a plus
- Knowledge and programming skills in one or several programming or scripting languages (C++, Python, Matlab) is a plus
- Strong organizational skills
- Strong collaborative mindset, willingness and ability to work effectively in agile teams

What you can look forward to

- Become part of an agile company, actively shape topics and benefit from flat hierarchies in a highly motivated team
- Enjoy an attractive salary, flexible working hours and 30 days of vacation
- The freedom to contribute your own ideas and drive them forward
- Celebrate successes together with company events
- Take advantage of our corporate benefits program
- And even more fun with great colleagues

Apply

We are looking forward to meeting you and shaping the future of robotics together. Are you in?

Couldn't find a suitable position? Please send us an unsolicited application.

We are always looking for passionate tech enthusiasts to help us revolutionize the world of robotics!
