

Welcome to **NEURA Robotics**, the innovator of the robotics world. Our goal is to equip collaborative robots with groundbreaking cognitive capabilities to enable safe and intuitive collaboration with humans. Under the leadership of founder David Reger, we have spent the first years of **NEURA Robotics** laying the foundations for humans and robots to work hand in hand.

"We serve humanity" is not just a motto, but our mission. Become part of our ambitious, international company and shape the future of robotics with us.

Welcome to **NEURA Robotics** - where innovation meets team spirit.

Your mission & challenges

In this role, you will lead the "Nuraverse" cloud ecosystem by orchestrating a complex synergy between our internal engineering teams and external partners. You aren't just managing a cloud migration, you are directing the backbone of a global robotic nervous system, ensuring our hardware and AI interact flawlessly with the world's most advanced cloud and chipset infrastructures.

- **Strategic Partner Management:** Act as the primary technical and strategic lead for external partnerships, ensuring roadmaps are synchronized and NEURA's requirements are prioritized.
- **Internal & External Bridge:** Translate high-level architectural needs between internal Robotics/AI teams and external partner engineering teams to ensure seamless integration of cloud services and edge computing capabilities.
- **End-to-End Delivery:** Oversee the full lifecycle of cloud-based robotics projects, ensuring that partner-provided technologies (chipsets, cloud instances, AI tools) are successfully implemented into our product line.

- Scalability & Architecture: Direct the scaling of our cloud infrastructure to optimize robot performance and data security.
- Contractual & Technical Alignment: Manage project-specific KPIs, SLAs, and technical milestones with external vendors to ensure delivery remains on time, within budget, and at the highest quality.
- Risk Mitigation: Proactively identify bottlenecks in the supply chain of cloud services or hardware-software dependencies, developing contingency plans to keep internal development moving at "NEURA speed."

What we can look forward to

- Experience: 10+ years of project/program management experience, specifically in environments where external vendor management of hyperscalers (AWS/Azure) or semiconductor leaders (Qualcomm/NVIDIA) was a primary focus.
- Partner Savvy: Proven ability to navigate the ecosystems of large-scale tech partners, understanding how to leverage their support structures to benefit internal development.
- Leadership: A "Human" leader who can influence cross-functional teams without direct authority and manage high-pressure negotiations with external stakeholders.
- Methodology: Mastery of Agile and Hybrid project management; experience with Jira/Confluence as the "source of truth" for complex, multi-party integrations.
- Education: A degree in Computer Science, Electrical Engineering, or a related field; MBA or PMP certification is a strong plus.
- Language: Fluency in English is a must; German is a strong advantage for local coordination at our Metzingen HQ.

What you can look forward to

- Become part of an agile company, actively shape topics and benefit from flat hierarchies in a highly motivated team
- Enjoy an attractive salary, flexible working hours and 30 days of vacation
- The freedom to contribute your own ideas and drive them forward
- Celebrate successes together with company events
- Take advantage of our corporate benefits program
- And even more fun with great colleagues

Apply

We are looking forward to meeting you and shaping the future of robotics together. Are you in?

Couldn't find a suitable position? Please send us an unsolicited application.

We are always looking for passionate tech enthusiasts to help us revolutionize the world of robotics!
