

Welcome to **NEURA Robotics**, the innovator of the robotics world. Our goal is to equip collaborative robots with groundbreaking cognitive capabilities to enable safe and intuitive collaboration with humans. Under the leadership of founder David Reger, we have spent the first years of **NEURA Robotics** laying the foundations for humans and robots to work hand in hand.

"**We serve humanity**" is not just a motto, but our mission. Become part of our ambitious, international company and shape the future of robotics with us.

Welcome to **NEURA Robotics** - where innovation meets team spirit.

Your mission & challenges

We are looking for an ambitious Quality Engineer who, with technical expertise, a hands-on mentality, and an innovative spirit, will take our product quality to the next level and help us build scalable, future-proof processes together.

Your responsibilities include:

Quality Assurance & Control:

- Conduct root cause analyses and implement corrective and preventive actions.

Testing & Validation:

- Develop and execute test plans for hardware components.
- Monitor burn-in tests and performance tests.
- Collaborate with development teams to validate new designs and updates.

Supplier & Production Quality:

- Evaluate and audit suppliers to ensure the quality of incoming materials.
- Implement statistical process control (SPC) and conduct process capability studies.
- Work closely with production teams to resolve quality-related issues in manufacturing.

Documentation & Reporting:

- Create and maintain detailed quality documentation, including test reports, risk assessments, and Failure Mode and Effects Analyses (FMEA).

Continuous Improvement:

- Identify trends and proactively propose process and design improvements.

What we can look forward to

- Bachelor's or Master's degree in Mechatronics or a related field.
- At least 5 years of experience in quality management and development environments.
- Solid knowledge of sensors, actuators, control systems, robotics, and programming (e.g., Python/C++).
- Experience in the analysis and measurement of electronic and mechanical components.
- Strong knowledge of quality standards and methodologies (ISO standards, Six Sigma, SPC).
- In-depth knowledge of relevant standards (ISO 9001).
- Experience with quality tools such as FMEA, 8D, and root cause analysis.
- Strong problem-solving skills and attention to detail.
- Excellent communication skills in German and English, both written and spoken.

What you can look forward to

- Become part of an agile company, actively shape topics and benefit from flat hierarchies in a highly motivated team
- Enjoy an attractive salary, flexible working hours and 30 days of vacation
- The freedom to contribute your own ideas and drive them forward
- Celebrate successes together with company events

- Take advantage of our corporate benefits program
- And even more fun with great colleagues

Apply

We are looking forward to meeting you and shaping the future of robotics together. Are you in?

Couldn't find a suitable position? Please send us an unsolicited application.

We are always looking for passionate tech enthusiasts to help us revolutionize the world of robotics!
