Welcome to **NEURA Robotics**, the innovator of the robotics world. Our goal is to equip collaborative robots with groundbreaking cognitive capabilities to enable safe and intuitive collaboration with humans. Under the leadership of founder David Reger, we have spent the first years of **NEURA Robotics** laying the foundations for humans and robots to work hand in hand.

"We serve humanity" is not just a motto, but our mission. Become part of our ambitious, international company and shape the future of robotics with us.

Welcome to **NEURA Robotics** - where innovation meets team spirit.

Your mission & challenges

Together, we are taking the step into a new era of cognitive robots:

- Develop and implement detailed Gherkin test cases and corresponding step definitions using Cucumber, Selenium, and Java for both GUI and API testing.
- Execute automated and manual tests, analyze outcomes to detect defects or performance bottlenecks.
- Log, track, and communicate issues discovered during testing, working closely with engineering teams to drive timely resolution.
- Create and maintain clear test documentation and user guides, while continuously enhancing the test framework to boost efficiency and coverage.

- Work collaboratively with system engineers to ensure effective testing of software components and contribute to overall product stability.
- Proactively identify opportunities to refine testing practices and introduce improvements to streamline test development and execution.

What we can look forward to

- Bachelor's or Master's degree in Robotics, Computer Science, Mechanical Engineering, Electrical Engineering, or a related field but strong background in robotics
- Minimum of 3-5 years of experience in test automation , system testing, validation, or verification of complex systems, preferably in the robotics industry
- Proficiency in programming languages such as Java and Python.
- Fluency in English is required
- Hands-on experience with testing frameworks such as Maven, Selenium, and Cucumber for BDD, along with proficiency in version control using Git.

What you can look forward to

- Become part of an agile company, actively shape topics and benefit from flat hierarchies in a highly motivated team
- Enjoy an attractive salary, flexible working hours and 30 days of vacation
- The freedom to contribute your own ideas and drive them forward
- Celebrate successes together with company events
- Take advantage of our corporate benefits program
- And even more fun with great colleagues

Apply

We are looking forward to meeting you and shaping the future of robotics together. Are you in?

Couldn't find a suitable position? Please send us an unsolicited application.
We are always looking for passionate tech enthusiasts to help us revolutionize the world of robotics!
