

Welcome to **NEURA Robotics**, the innovator of the robotics world. Our goal is to equip collaborative robots with groundbreaking cognitive capabilities to enable safe and intuitive collaboration with humans. Under the leadership of founder David Reger, we have spent the first years of **NEURA Robotics** laying the foundations for humans and robots to work hand in hand.

**"We serve humanity"** is not just a motto, but our mission. Become part of our ambitious, international company and shape the future of robotics with us.

Welcome to **NEURA Robotics** - where innovation meets team spirit.

## Your mission & challenges

As a Quality Project Manager, you take full ownership of a company-wide quality management project and further develop our systems in line with ISO 9001 and IATF 16949. You analyze processes, drive improvements, and ensure compliance with all relevant requirements. You lead cross-functional teams, support audits, and ensure transparency through KPIs and quality performance tracking.

- You take full responsibility for leading a large-scale quality management project and drive it from planning through to execution.
- You implement and continuously improve processes in line with ISO 9001 and automotive standards such as IATF 16949.
- You conduct process and risk analyses and derive targeted improvement measures.
- You plan, prepare, and support internal and external audits.
- You introduce, develop, and monitor relevant quality KPIs to ensure overall quality performance.
- You ensure compliance with regulatory, legal, and customer-specific requirements.

- You lead cross-functional project teams and ensure clear and effective communication with stakeholders at all levels.

## What we can look forward to

- You have successfully completed a degree in engineering, business administration, or a comparable qualification.
- You bring several years of experience in quality management, ideally in roles such as Quality Management Representative, Deputy QMR, Quality Manager, process expert, or project manager in a quality management environment.
- You have solid knowledge of ISO 9001 and ideally also IATF 16949 standards. Experience in the automotive industry is a plus.
- You have strong expertise in process management, for example in process modeling or continuous improvement (CIP), and experience in leading complex projects.
- You work in a structured, analytical, and solution-oriented manner and demonstrate strong communication skills as well as assertiveness.
- Additionally, you have very good German and good English language skills.

## What you can look forward to

- Become part of an agile company, actively shape topics and benefit from flat hierarchies in a highly motivated team
- Enjoy an attractive salary, flexible working hours and 30 days of vacation
- The freedom to contribute your own ideas and drive them forward
- Celebrate successes together with company events
- Take advantage of our corporate benefits program
- And even more fun with great colleagues
