

Welcome to **NEURA Robotics**, the innovator of the robotics world. Our goal is to equip collaborative robots with groundbreaking cognitive capabilities to enable safe and intuitive collaboration with humans. Under the leadership of founder David Reger, we have spent the first years of **NEURA Robotics** laying the foundations for humans and robots to work hand in hand.

"We serve humanity" is not just a motto, but our mission. Become part of our ambitious, international company and shape the future of robotics with us.

Welcome to **NEURA Robotics** - where innovation meets team spirit.

Your mission & challenges

As a Network Engineer, you will be an integral part of our IT team, responsible for leading and enhancing our network infrastructure in a cloud-heavy environment. You will ensure seamless and secure network operations, contributing directly to the success of our pioneering robotics technology.

- Direct, plan, and execute network improvement initiatives to optimize performance, reach, and security.
- Evaluate network needs for new facilities and oversee their infrastructure setup from start to finish.
- Provide advanced technical support to resolve complex network issues promptly and efficiently.

- Offer expert recommendations on designing secure networks that align with industry best practices and company security policies.
- Develop network security policies and guide their implementation.
- Design LANs, WANs, and VPNs and lead their implementation to ensure reliable and secure network connectivity across all company locations.
- Guide secure configuration and maintenance of network hardware, including routers, switches, firewalls, and wireless access points.
- Monitor network performance and troubleshoot issues to minimize downtime and ensure optimal operations.
- Develop and maintain comprehensive network documentation, including topology diagrams and procedures for network configurations and maintenance.
- Collaborate with cross-functional teams to support various IT and business initiatives, ensuring network requirements are met.
- Stay informed of emerging technologies and industry trends to ensure the company's network infrastructure remains current and robust.

What we can look forward to

In-depth knowledge backed by relevant education, degree, and/or certification.

- Minimum of 3 years hands-on experience in networking roles, demonstrating a deep understanding of industry-standard technologies and methodologies.
- Strong knowledge of networking and routing protocols.
- Proficiency in configuring and managing network equipment from vendors like HP, Sophos, Fortigate, or similar
- Good Experience in the deployment, troubleshooting, and maintenance of wireless networks and Ethernet infrastructure.
- Proficiency with network monitoring tools and software
- Experience with Zero-Trust principles and methodologies
- Knowledge of automation tools and scripting languages (e.g., Python, PowerShell, Ansible)
- Excellent problem-solving skills and the ability to lead the resolution of major incidents with a highly methodical and analytical approach.
- Strong communication skills in English (spoken and written) and the ability to articulate technical information to non-technical stakeholders.

- Dedicated team player with strong collaborative skills to work effectively with cross-functional teams and stakeholders.

What you can look forward to

- Become part of an agile company, actively shape topics and benefit from flat hierarchies in a highly motivated team
- Enjoy an attractive salary, flexible working hours and 30 days of vacation
- The freedom to contribute your own ideas and drive them forward
- Celebrate successes together with company events
- Take advantage of our corporate benefits program
- And even more fun with great colleagues

[Apply](#)

We are looking forward to meeting you and shaping the future of robotics together. Are you in?

Couldn't find a suitable position? Please send us an unsolicited application.

We are always looking for passionate tech enthusiasts to help us revolutionize the world of robotics!
