

Welcome to **NEURA Robotics**, the innovator of the robotics world. Our goal is to equip collaborative robots with groundbreaking cognitive capabilities to enable safe and intuitive collaboration with humans. Under the leadership of founder David Reger, we have spent the first years of **NEURA Robotics** laying the foundations for humans and robots to work hand in hand.

"We serve humanity" is not just a motto, but our mission. Become part of our ambitious, international company and shape the future of robotics with us.

Welcome to **NEURA Robotics** - where innovation meets team spirit.

Your mission & challenges

Join Neura Robotics, a dynamic and innovative start-up that is revolutionizing robotics technology. As a Senior Network Engineer, you will play an active role in shaping the security, resilience, and scalability of our network infrastructure in a highly cloud-based environment. With us, you will benefit from short decision-making paths, plenty of freedom to shape your work, and a relaxed, collaborative atmosphere.

As a Senior Network Engineer, you will be an important part of our IT team, ensuring that our network runs smoothly and securely – directly contributing to the success of the company.

 You plan, lead, and implement initiatives that significantly improve the performance, reach, and security of our network infrastructure.

- You define requirements for the network infrastructure (e.g., for new locations) and oversee the end-to-end implementation.
- When critical network incidents occur, you coordinate their resolution in a calm, structured, and goal-oriented manner.
- You provide guidance on secure network architectures in line with best practices and our security guidelines.
- You are responsible for the secure configuration and operation of network hardware such as routers, switches, firewalls, and WLAN access points.
- You keep our network documentation lean and up to date from topology diagrams to standards and work instructions.
- You work closely with cross-functional teams and ensure that network requirements are considered at an early stage.

What we can look forward to

- You have at least three years of hands-on experience as a Network Administrator, Network Engineer, or in a comparable role.
- You possess solid knowledge of network and IT system architecture.
- You bring experience with automation and scripting, for example in Python, PowerShell, or Ansible.
- You have excellent problem-solving skills and approach challenges in an analytical, methodical, and pragmatic way.
- You are fluent in English, both spoken and written.
- You are able to communicate complex technical matters in a simple and understandable manner.
- You are a true team player, you communicate clearly, enjoy sharing knowledge, and collaborate at eye level with other departments.

What you can look forward to

- Become part of an agile company, actively shape topics and benefit from flat hierarchies in a highly motivated team
- Enjoy an attractive salary, flexible working hours and 30 days of vacation
- The freedom to contribute your own ideas and drive them forward

- Celebrate successes together with company events
- Take advantage of our corporate benefits program
- And even more fun with great colleagues

We are looking forward to meeting you and shaping the future of robotics together. Are you in?

Couldn't find a suitable position? Please send us an unsolicited application.

We are always looking for passionate tech enthusiasts to help us revolutionize the world of robotics!
