

Welcome to **NEURA Robotics**, the innovator of the robotics world. Our goal is to equip collaborative robots with groundbreaking cognitive capabilities to enable safe and intuitive collaboration with humans. Under the leadership of founder David Reger, we have spent the first years of **NEURA Robotics** laying the foundations for humans and robots to work hand in hand.

**"We serve humanity"** is not just a motto, but our mission. Become part of our ambitious, international company and shape the future of robotics with us.

Welcome to **NEURA Robotics** - where innovation meets team spirit.

## Your mission & challenges

Are you passionate about innovation and eager to play an active role in shaping research projects? Then become part of our team and help us coordinate and implement exciting development projects.

Your main responsibilities include:

- **Request Handling:** Responsible for processing inquiries related to research projects, primarily submitted by universities or research institutes.
- **Alignment:** Coordination of research topics with development departments and the company's strategic direction.
- **Work Package Development:** Preparation of a detailed work plan to ensure effective project execution.

- **Cost Calculation:** Performing cost calculations for various projects to ensure budget compliance.
- **Project Drafting:** Creating project outlines and descriptions that serve as the basis for funding applications.
- **Coordination:** Responsible for coordinating interim reports and fund requests during project implementation.
- **Controlling:** Monitoring and evaluating the progress of research topics with regard to time, budget, and goal achievement; early identification of deviations and initiation of appropriate corrective actions.

## What we can look forward to

- Basic knowledge and interest in project coordination; initial experience in project work is desirable but not mandatory.
- Interest in funded research projects and the associated administrative processes.
- Basic knowledge in the fields of robotics and artificial intelligence (AI) is an advantage but not required.
- Familiarity with the fundamentals of cost and performance accounting as well as relevant business administration knowledge is desirable.
- Technical understanding and interest in modern technologies.

## What you can look forward to

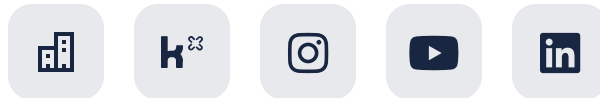

- Become part of an agile company, actively shape topics and benefit from flat hierarchies in a highly motivated team
- Enjoy an attractive salary, flexible working hours and 30 days of vacation
- The freedom to contribute your own ideas and drive them forward
- Celebrate successes together with company events
- Take advantage of our corporate benefits program
- And even more fun with great colleagues
