Welcome to **NEURA Robotics**, the innovator of the robotics world. Our goal is to equip collaborative robots with groundbreaking cognitive capabilities to enable safe and intuitive collaboration with humans. Under the leadership of founder David Reger, we have spent the first years of **NEURA Robotics** laying the foundations for humans and robots to work hand in hand.

"We serve humanity" is not just a motto, but our mission. Become part of our ambitious, international company and shape the future of robotics with us.

Welcome to **NEURA Robotics** - where innovation meets team spirit.

Launch and Shape a RoboGym

NeuraGym is our physical AI training center, where we collaborate with our partners to gather extensive data and teach robots at scale. It serves as the infrastructure where applications are developed for all our robots - from our cognitive robots arm MAiRA to our humanoid 4NE-1 and our service robot MiPA.

The Group's IT department has over 20 members and provides support to more than 1,200 users. You'll join the parent company's IT team of 10 people, working alongside two Linux Admins, as well as collaborating closely with both the robotics and DevOps teams.

Your mission & challenges

- Develop advanced automated configuration management strategies for Linux Systems Analyzing, operating, and setting up solutions based on OSS, such as:
  - Configuration management systems (e.g. Ansible)
  - Video data processing systems
- Provide 2nd level support for Ubuntu Linux and other OSS
- Collaborate with the product team to roll out highly scalable cloud services on private and public cloud infrastructure

What we can look forward to

Must-have:

- Minimum of 3 years' experience in Linux system administration
- Strong capability in workload analysis, capacity planning, and selection of computing hardware platforms based on performance, scalability, and reliability requirements.
- Proficiency in relevant scripting languages such as shell, python
- Strong grasp of networking principles
- Comprehensive knowledge of Debian-based Operating Systems, particularly Ubuntu
- Excellent written and spoken communication skills in English (B2 or better)
- Strong analytical skills and a methodical approach to problem-solving
- A dedicated and collaborative team player
- Valid driver's license

What you can look forward to

- Become part of an agile company, actively shape topics and benefit from flat hierarchies in a highly motivated team
- Enjoy an attractive salary, flexible working hours and 30 days of vacation The freedom to contribute your own ideas and drive them forward
- Celebrate successes together with company events

- Take advantage of our corporate benefits program And even more fun with great colleagues

Apply

We are looking forward to meeting you and shaping the future of robotics together. Are you in?

Couldn't find a suitable position? Please send us an unsolicited application.
We are always looking for passionate tech enthusiasts to help us revolutionize the world of robotics!
