

Welcome to **NEURA Robotics**, the innovator of the robotics world. Our goal is to equip collaborative robots with groundbreaking cognitive capabilities to enable safe and intuitive collaboration with humans. Under the leadership of founder David Reger, we have spent the first years of **NEURA Robotics** laying the foundations for humans and robots to work hand in hand.

**"We serve humanity"** is not just a motto, but our mission. Become part of our ambitious, international company and shape the future of robotics with us.

Welcome to **NEURA Robotics** - where innovation meets team spirit.

## Your mission & challenges

As an AI Data Annotation Specialist, you will operate at the intersection of data ingestion, processing, and machine learning. Your primary responsibility is to design and maintain scalable workflows for automated data annotation, while ensuring that datasets are properly validated, standardized, and formatted for efficient model training.

You play a critical role in enabling high-quality AI systems by transforming raw data into structured, reliable training datasets.

- Design, build, and maintain pipelines for automated and semi-automated data annotation
- Ingest and integrate data from multi modal sources into structured data workflows
- Apply pre-labeling techniques using existing models to accelerate annotation processes

- Validate and ensure the quality, consistency, and completeness of annotated datasets
- Identify and resolve data quality issues, inconsistencies, and biases
- Transform and standardize datasets into model-ready formats
- Collaborate closely with ML Engineers to optimize datasets for training and evaluation

## What we can look forward to

- Degree in Computer Science, Data Science, Engineering, or a related field
- 3+ years of experience in machine learning operations, AI, or software engineering
- Strong programming skills in Python and C++
- Solid understanding of AI / machine learning fundamentals and data requirements
- Experience with data annotation tools or labeling workflows
- Familiarity with dataset structuring and formatting for ML frameworks (e.g., robotics datasets, multimodal data)
- Strong attention to detail and a quality-driven mindset
- Experience with cloud platforms (AWS, GCP, Azure) is a plus

## What you can look forward to

- Become part of an agile company, actively shape topics and benefit from flat hierarchies in a highly motivated team
- Enjoy an attractive salary, flexible working hours and 30 days of vacation
- The freedom to contribute your own ideas and drive them forward
- Celebrate successes together with company events
- Take advantage of our corporate benefits program
- And even more fun with great colleagues
