

Welcome to **NEURA Robotics**, the innovator of the robotics world. Our goal is to equip collaborative robots with groundbreaking cognitive capabilities to enable safe and intuitive collaboration with humans. Under the leadership of founder David Reger, we have spent the first years of **NEURA Robotics** laying the foundations for humans and robots to work hand in hand.

"We serve humanity" is not just a motto, but our mission. Become part of our ambitious, international company and shape the future of robotics with us.

Welcome to **NEURA Robotics** - where innovation meets team spirit.

Your mission & challenges

As an Assembly and Commissioning Technician at Neura Robotics, you will be responsible for the precise mechanical assembly and commissioning of our 4NE-1 humanoid robot and its sub-assemblies. You will work closely with our development and engineering teams to ensure that our products meet the highest standards and function smoothly. This includes:

- Mechanical design, assembly, and integration of humanoid robot system prototypes
- Assembly of components, joints, actuators, and gearboxes
- Reading and implementing technical drawings and CAD derivations
- Adaptation, reworking, and optimization of components during the prototype phase
- Support during commissioning, testing, and modifications
- Identifying assembly problems and providing feedback to the design department
- Handling measuring equipment for functional and quality testing

- Documenting assembly processes and prototype modifications
- Maintaining tools, fixtures, and workstations

What we can look forward to

Must-have:

- Completed training as an industrial mechanic, precision mechanic, mechatronics engineer, or comparable
- Experience in prototype construction or in the assembly of complex assemblies
- Very good understanding of mechanical assemblies and machine elements
- Confident reading of technical drawings
- Manual dexterity, precise and clean working methods
- Independent, solution-oriented working style
- Ability to work in a team and good communication skills
- Good language skills in German or English
- Willingness to travel occasionally to support installations and commissioning at customer sites and at trade fairs

Nice-to-have:

- Experience in robotics, automation, or special machine construction
- Experience with actuators, gearboxes, or mechatronic systems
- Knowledge of electrical/electronics (e.g., cabling)

What you can look forward to

- Become part of an agile company, actively shape topics and benefit from flat hierarchies in a highly motivated team
- Enjoy an attractive salary, flexible working hours and 25 days of vacation
- Collaboration on highly innovative humanoid robotics systems
- Excellent location in Zurich Seefeld

- New and state-of-the-art office space and workstations
- The freedom to contribute your own ideas and drive them forward
- Celebrate successes together with company events
- Take advantage of our corporate benefits program
- And even more fun with great colleagues

[Apply](#)

We are looking forward to meeting you and shaping the future of robotics together. Are you in?

Couldn't find a suitable position? Please send us an unsolicited application.

We are always looking for passionate tech enthusiasts to help us revolutionize the world of robotics!
