

Welcome to **NEURA Robotics**, the innovator of the robotics world. Our goal is to equip collaborative robots with groundbreaking cognitive capabilities to enable safe and intuitive collaboration with humans. Under the leadership of founder David Reger, we have spent the first years of **NEURA Robotics** laying the foundations for humans and robots to work hand in hand.

"We serve humanity" is not just a motto, but our mission. Become part of our ambitious, international company and shape the future of robotics with us.

Welcome to **NEURA Robotics** - where innovation meets team spirit.

Your mission & challenges

Your general tasks:

- Preparation of high-quality, standards-compliant technical documentation in English (e.g., operating, assembly, repair, and maintenance instructions)
- Structured creation, maintenance, and further development of modular content in the XML-based content management system Quanos Schema ST4
- Development and optimization of efficient information architectures and documentation structures
- Creation of translation-friendly content and support of the translation and localization process
- Close collaboration with interdisciplinary, cross-site teams throughout the product development process
- Use of modern collaboration and knowledge-management tools: Confluence, Jira, Teams, SharePoint

Your focus tasks:

- Establishment, expansion, and further development of content-delivery channels — including the design of new platforms and the modernization or replacement of existing systems
- Responsibility for the digital delivery and publication of technical content across internal and external channels, such as:
 - Websites
 - Download and service portals
 - PDF and HTML-based online documentation
- Development and further development of a company-wide content-delivery strategy (including variant management, version management, and multi-channel output)
- Optimization of XML-based publication processes within ST4 and connected systems (e.g., ERP, PLM)
- Ensuring consistent, target-group-oriented content for customers, service, sales, and partners

What we can look forward to

- Training as a Technical Writer or a comparable qualification, or specialization in a relevant field
Alternatively: technical degree or graduation from a technical college
- Professional experience in technical documentation or in a comparable content or publishing environment (e.g., web/portal content, technical information systems)
- Very good command of English (main documentation language); good German skills desirable
- Experience with content management systems (preferably Quanos Schema ST4), XML, and modular documentation
- Confident use of MS Office and modern collaboration tools (Confluence, Jira, Teams, SharePoint)
- Strong writing skills and the ability to prepare complex technical content accurately and clearly
- Knowledge of relevant standards (Machinery Directive, VDI guidelines)
- Structured, independent working style and strong communication skills
- Experience in content delivery via websites, download and service portals
- Knowledge of multi-channel publishing (PDF, HTML5, WebHelp)
- Experience with XML-based publication processes in Quanos Schema ST4
- Understanding of structured information models (e.g., iiRDS)
- Experience in robotics or related mechatronics/automation environments is desirable
- Collaboration with stakeholders from service, sales, support, product management, and marketing I

What you can look forward to

- Become part of an agile company, actively shape topics and benefit from flat hierarchies in a highly motivated team
- Enjoy an attractive salary, flexible working hours and 30 days of vacation
- The freedom to contribute your own ideas and drive them forward
- Celebrate successes together with company events
- Take advantage of our corporate benefits program
- And even more fun with great colleagues

Apply

We are looking forward to meeting you and shaping the future of robotics together. Are you in?

Couldn't find a suitable position? Please send us an unsolicited application.

We are always looking for passionate tech enthusiasts to help us revolutionize the world of robotics!
