

#### Welcome to NEURA Robotics!

NEURA Robotics is a high-tech robotics company which is poised to usher the way into the cognitive era by building intelligent robotic assistants which amplify humans and focus on solving societies biggest issues e.g. the aging society.

At NEURA Robotics we believe that humans should be able to do what is at the core of the human nature. We want to enable people to express their creativity and focus more on social interactions again instead of doing unhealthy and monotonous jobs, which is still very common among the general society. Hence everything we do is based on the slogan: "WE SERVE HUMANITY".

# **Full Stack Developer (human)**

### Your Tasks:

Together, we are taking the step into a new era of cognitive robots:

- Develop and implement an intuitive and stylish general user interface for industrial robots
- Develop and implement algorithms for logical and graphical functionalities
- Support the GUI team by executing your own development projects and take responsibility for integral components of a newly developed robotic system

- Work with an interdisciplinary team of experts and get deep insight into all major software interfaces related to the general user interface
- Help your colleagues to overcome challenges and provide an inspiring working environment through supporting creativity and openness

#### Your Profile:

You are a technology enthusiast who wants to change the world for the better. You are passionate about your work, driven by a problem-solving mentality and have the following skills:
