

Welcome to **NEURA Robotics**, the innovator of the robotics world. Our goal is to equip collaborative robots with groundbreaking cognitive capabilities to enable safe and intuitive collaboration with humans. Under the leadership of founder David Reger, we have spent the first years of **NEURA Robotics** laying the foundations for humans and robots to work hand in hand.

"We serve humanity" is not just a motto, but our mission. Become part of our ambitious, international company and shape the future of robotics with us.

Welcome to **NEURA Robotics** - where innovation meets team spirit.

Your mission & challenges

You have an eye for detail, understand manufacturing processes, and are always looking for the best solution? Then bring your ideas to the table and help us develop suppliers, products, and processes together.

Your main tasks include:

Supplier Qualification:

- Conduct audits for initial qualification and periodic re-evaluation of suppliers
- Assess the quality capabilities and technical competencies of potential suppliers
- Support supplier selection in close cooperation with Purchasing and Engineering

Supplier Development:

- Drive continuous improvement initiatives at supplier sites
- Identify and implement corrective actions in case of quality or performance deviations
- Monitor supplier performance through KPIs (e.g., on-time delivery, complaint rate) and initiate improvement plans

Technical Interface to Engineering:

- Collaborate closely with engineering during the design phase to ensure manufacturable and cost-effective drawings
- Advise design teams on economically viable production methods at suppliers
- Contribute to “Design-to-Cost” strategies during new product development

Cost Optimization:

- Identify cost-saving opportunities by involving suppliers early in the product development process
- Support make-or-buy decisions based on technical feasibility and cost efficiency

What we can look forward to

- Degree in Mechanical Engineering, Industrial Engineering, or a similar technical field
- Several years of professional experience in quality, engineering, procurement, or production, ideally with supplier interaction
- Strong ability to read and interpret technical drawings and specifications
- Solid understanding of manufacturing processes (e.g., machining, sheet metal, plastics) and their cost implications

What you can look forward to

- Become part of an agile company, actively shape topics and benefit from flat hierarchies in a highly motivated team
- Enjoy an attractive salary, flexible working hours and 30 days of vacation
- The freedom to contribute your own ideas and drive them forward
- Celebrate successes together with company events

- Take advantage of our corporate benefits program
- And even more fun with great colleagues
