

Welcome to **NEURA Robotics**, the innovator of the robotics world. Our goal is to equip collaborative robots with groundbreaking cognitive capabilities to enable safe and intuitive collaboration with humans. Under the leadership of founder David Reger, we have spent the first years of **NEURA Robotics** laying the foundations for humans and robots to work hand in hand.

**"We serve humanity"** is not just a motto, but our mission. Become part of our ambitious, international company and shape the future of robotics with us.

Welcome to **NEURA Robotics** - where innovation meets team spirit.

## Your mission & challenges

- Design, build, and install wire harnesses and electrical systems based on technical drawings, schematics, and engineering specifications.
- Create, maintain, and oversee wiring and cabling plans for all company products, ensuring consistency, reliability, and adherence to design standards.
- Interpret and analyze wiring diagrams, layout drawings, and technical documentation.
- Perform system-level electrical integration and ensure compatibility with mechanical and software components.
- Diagnose and troubleshoot faults in wiring systems and electrical components.
- Carry out routine maintenance and repairs on electrical systems and assemblies.

- Test and validate electrical circuits and connections using tools such as multimeters, oscilloscopes, and continuity testers.
- Collaborate closely with engineers, designers, and other technicians to develop and improve electrical systems.
- Document all work performed, update schematics, and maintain technical records.
- Ensure all work complies with applicable electrical codes, safety standards, and regulatory requirements.

## **What we can look forward to**

- Completed vocational training or degree in Electrical Engineering, Mechatronics, or a related technical field.
- Hands-on experience in assembling and integrating electrical systems – ideally in robotics, machinery, or automotive applications.
- Solid understanding of electrical schematics, wiring diagrams, and technical drawings.
- Proficiency with electrical testing and diagnostic tools.
- Experience in prototyping, transitioning to production, or supporting manufacturing is a plus.
- Structured and solution-oriented mindset with a high level of personal responsibility.
- Team player with strong communication skills and a proactive attitude.
- Very good command of German and English skills.

## **What you can look forward to**

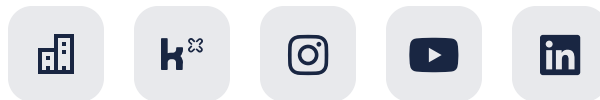

- Become part of an agile company, actively shape topics and benefit from flat hierarchies in a highly motivated team
- Enjoy an attractive salary, flexible working hours and 30 days of vacation
- The freedom to contribute your own ideas and drive them forward
- Celebrate successes together with company events
- Take advantage of our corporate benefits program
- And even more fun with great colleagues
