

Welcome to **NEURA Robotics**, the innovator of the robotics world. Our goal is to equip collaborative robots with groundbreaking cognitive capabilities to enable safe and intuitive collaboration with humans. Under the leadership of founder David Reger, we have spent the first years of **NEURA Robotics** laying the foundations for humans and robots to work hand in hand.

"We serve humanity" is not just a motto, but our mission. Become part of our ambitious, international company and shape the future of robotics with us.

Welcome to **NEURA Robotics** - where innovation meets team spirit.

Your mission & challenges

As a Production Planner (human), you will play a key role in the operational planning and control of our manufacturing processes for innovative robotic and sensor systems. You ensure that production orders are efficiently scheduled, released on time, and executed smoothly – taking into account material availability, capacity, and production targets. With your organizational skills and process-oriented mindset, you contribute significantly to the performance of our digitalized manufacturing environment.

Your main tasks include:

- Plan, check availability, and release production orders
- Provide and maintain production documentation
- Create, monitor, and adjust production schedules
- Contribute to the further development of detailed production planning and control processes
- Coordinate production deadlines based on material availability and capacity planning
- Identify bottlenecks and develop measures to increase capacity

- Act as an interface between production, purchasing, logistics, quality management, engineering, and sales
- Take responsibility for inventory management and documentation
- Monitor stock levels and work-in-progress inventory
- Actively communicate with sales, production, and engineering teams to coordinate prototype and series production timelines

What we can look forward to

- Completed training as an industrial clerk, technician, or a degree in business/engineering or a comparable qualification
- Ideally, experience in an industrial company in the area of production planning or control
- Confident handling of ERP systems, preferably Microsoft Dynamics
- Solid knowledge of production planning and control processes
- High level of initiative, assertiveness, and organizational skills
- Proficient in MS Office, especially Excel
- Technical and entrepreneurial thinking with a structured, process-oriented working style
- Strong team and communication skills
- Problem-solving ability and mediation skills

What you can look forward to

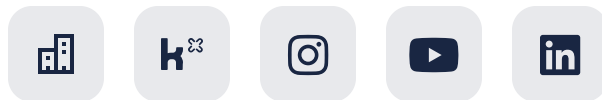

- Become part of an agile company, actively shape topics and benefit from flat hierarchies in a highly motivated team
- Enjoy an attractive salary, flexible working hours and 30 days of vacation
- The freedom to contribute your own ideas and drive them forward
- Celebrate successes together with company events
- Take advantage of our corporate benefits program
- And even more fun with great colleagues

[Apply](#)

We are looking forward to meeting you and shaping the future of robotics together. Are you in?

Couldn't find a suitable position? Please send us an unsolicited application.

We are always looking for passionate tech enthusiasts to help us revolutionize the world of robotics!
