

Welcome to **NEURA Robotics**, the innovator of the robotics world. Our goal is to equip collaborative robots with groundbreaking cognitive capabilities to enable safe and intuitive collaboration with humans. Under the leadership of founder David Reger, we have spent the first years of **NEURA Robotics** laying the foundations for humans and robots to work hand in hand.

**"We serve humanity"** is not just a motto, but our mission. Become part of our ambitious, international company and shape the future of robotics with us.

Welcome to **NEURA Robotics** - where innovation meets team spirit.

## Your mission & challenges

You don't just want to measure and inspect – you want to actively shape the quality of our products. As a Quality Technician, you play a central role in ensuring our quality standards, from incoming goods inspections to process analysis and improvement. With your eye for detail, technical understanding, and hands-on mentality, you make sure that quality is not only maintained but continuously enhanced.

- You conduct incoming goods inspections according to test plans and technical drawings to ensure that all materials meet quality requirements.
- You plan and execute initial sample inspections and carefully document the results.
- You operate and program measurement and testing equipment, such as coordinate measuring machines, optical measurement systems, or manual measuring tools.
- You evaluate measurement results, analyze them, and systematically document your findings.
- You create and maintain test reports, inspection plans, and measurement protocols to ensure transparent traceability.

- You support root cause analyses of quality deviations and oversee corrective and improvement measures.
- You work closely with production, development, and suppliers to achieve optimal solutions.
- You ensure that all quality standards, norms, and internal requirements are consistently met.

## What we can look forward to

- You have completed a technical training, for example as an industrial mechanic, mechatronics technician, or in a comparable field.
- You have 3 to 5 years of professional experience in metrology and quality assurance.
- You have completed further training as a metrology technician and possess strong skills in reading technical drawings and tolerances.
- You have experience with first article inspections and standard quality methods.
- You are proficient with measuring equipment and familiar with CMM software such as Zeiss CALYPSO, Hexagon PC-DMIS, or Renishaw MODUS.
- Ideally, you have completed AUKOM metrology technician training. You work in a structured, precise, and quality-conscious manner.
- Additionally, you have good written and spoken German and English skills.

## What you can look forward to

- Become part of an agile company, actively shape topics and benefit from flat hierarchies in a highly motivated team
- Enjoy an attractive salary, flexible working hours and 30 days of vacation
- The freedom to contribute your own ideas and drive them forward
- Celebrate successes together with company events
- Take advantage of our corporate benefits program
- And even more fun with great colleagues
