

Welcome to **NEURA Robotics**, the innovator of the robotics world. Our goal is to equip collaborative robots with groundbreaking cognitive capabilities to enable safe and intuitive collaboration with humans. Under the leadership of founder David Reger, we have spent the first years of **NEURA Robotics** laying the foundations for humans and robots to work hand in hand.

"We serve humanity" is not just a motto, but our mission. Become part of our ambitious, international company and shape the future of robotics with us.

Welcome to **NEURA Robotics** - where innovation meets team spirit.

Your mission & challenges

Together, we are taking the step into a new era of cognitive robots:

- Design and create comprehensive test plans, test cases, and testing strategies aimed at validating both hardware and software components of robotic systems
- Execute tests and analyze results to identify defects or performance issues
- Document, track, and communicate defects and issues found during testing, collaborating with engineering teams for resolution
- Write and maintain test documentation and guides, and enhance the testing framework to improve efficiency and coverage
- Collaborate with system engineers to test mainly software components effectively and ensure product maturity

- Identify areas for improvement in testing processes and implement changes to enhance test development and execution

What we can look forward to

- Bachelor's or Master's degree in Robotics, Mechanical Engineering, Electrical Engineering, Computer Science, or a related field but strong background in robotics
- Minimum of 3-5 years of experience in system testing, validation, or verification of complex systems, preferably in the robotics industry
- Proficiency in programming languages such as C++, Python, or Java
- Fluency in English is required
- Experience with testing frameworks (e.g., Pytest) and version control systems (e.g., Git)

What you can look forward to

- Become part of an agile company, actively shape topics and benefit from flat hierarchies in a highly motivated team
- Enjoy an attractive salary, flexible working hours and 30 days of vacation
- The freedom to contribute your own ideas and drive them forward
- Celebrate successes together with company events
- Take advantage of our corporate benefits program
- And even more fun with great colleagues

[Apply](#)

We are looking forward to meeting you and shaping the future of robotics together. Are you in?

Couldn't find a suitable position? Please send us an unsolicited application.

We are always looking for passionate tech enthusiasts to help us revolutionize the world of robotics!
