

Welcome to **NEURA Robotics**, the innovator of the robotics world. Our goal is to equip collaborative robots with groundbreaking cognitive capabilities to enable safe and intuitive collaboration with humans. Under the leadership of founder David Reger, we have spent the first years of **NEURA Robotics** laying the foundations for humans and robots to work hand in hand.

"We serve humanity" is not just a motto, but our mission. Become part of our ambitious, international company and shape the future of robotics with us.

Welcome to **NEURA Robotics** - where innovation meets team spirit.

Your mission & challenges

As a Project Buyer Electronics, you take on a key role in procuring all electronic components and assemblies for our development and series projects. You are deeply familiar with electronics and act as a central interface between development, suppliers, and production, building a robust and future-proof supply chain.

Your main responsibilities include:

- Independently procuring electronic components and assemblies such as PCBs, electronic components (ICs, semiconductors, sensors, connectors), wiring harnesses, controllers, and EMS assemblies
- Identifying, selecting, and developing suitable electronics suppliers and EMS partners—from distributors to specialized manufacturers

- Conducting technical and commercial offer comparisons and independently handling price and contract negotiations with a focus on electronic components
- Working closely with hardware development and project teams to ensure component availability throughout the product lifecycle—from prototypes to series production
- Active risk management for electronic components (e.g., obsolescence, supply shortages, second sources, lifecycle management)
- Ensuring on-time delivery and monitoring quality, supplier performance, and technical requirements
- Observing and analyzing global electronics markets, technologies, and supply chains
- Contributing to and further developing purchasing processes, tools, and ERP structures in the electronics environment

What we can look forward to

- Several years of experience in technical procurement, ideally with a clear focus on electronics, electrical engineering, or the EMS environment
- Solid technical understanding of electronic components, assemblies, and manufacturing processes (e.g., PCBs, assembly, semiconductors, electromechanical components)
- Ability to understand technical requirements, analyze bills of materials, and communicate with development teams on an equal footing
- Experience in project procurement, ideally in the context of development and series projects
- Strong negotiation skills, assertiveness, and entrepreneurial thinking
- Structured, analytical, and solution-oriented working style in a dynamic development environment
- Experience with ERP systems and understanding of purchasing and supply chain processes
- Fluent in German and English, both written and spoken

What you can look forward to

- Become part of an agile company, actively shape topics and benefit from flat hierarchies in a highly motivated team
- Enjoy an attractive salary, flexible working hours and 30 days of vacation

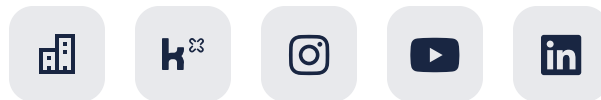

- The freedom to contribute your own ideas and drive them forward
- Celebrate successes together with company events
- Take advantage of our corporate benefits program
- And even more fun with great colleagues

Apply

We are looking forward to meeting you and shaping the future of robotics together. Are you in?

Couldn't find a suitable position? Please send us an unsolicited application.

We are always looking for passionate tech enthusiasts to help us revolutionize the world of robotics!
