

Welcome to **NEURA Robotics**, the innovator of the robotics world. Our goal is to equip collaborative robots with groundbreaking cognitive capabilities to enable safe and intuitive collaboration with humans. Under the leadership of founder David Reger, we have spent the first years of **NEURA Robotics** laying the foundations for humans and robots to work hand in hand.

"We serve humanity" is not just a motto, but our mission. Become part of our ambitious, international company and shape the future of robotics with us.

Welcome to **NEURA Robotics** - where innovation meets team spirit.

Your mission & challenges

In the humanoid robotics department, you will ensure that all CAD, PLM, and PDM environments run reliably and efficiently. Your responsibilities include:

- Administration, maintenance, and optimization of CAD, PLM, and PDM systems (CREO, SolidWorks, NX, Windchill)
- Creation and maintenance of CAD templates, assembly structures, and standard part libraries
- Supporting development engineers in CAD/PLM/PDM and design processes
- Setting up and managing CAD licenses, user rights, and permissions
- Installing, updating, and patch managing CAD software and engineering toolchains
- Training and supporting employees in CAD tools and workflows
- Supporting integration of new software tools into the CAD/PLM ecosystem

- Contributing to IT-related engineering projects, migrations, and tool rollouts

What we can look forward to

Must-have:

- Bachelor's degree in Mechanical Engineering, Industrial Engineering, Computer Science, Information Technology, or a related technical field
- Proven experience administering CREO, SolidWorks, NX, and/or Windchill
- Strong knowledge of PLM/PDM data structures, versioning, workflows, and release processes
- Experience creating/managing CAD templates, assembly structures, and libraries
- Experience with CAD software installation, updates, and patch management
- Competence in managing CAD licenses, floating license servers, roles, and permissions

Nice-to-have:

- CAD/PLM certifications (PTC, Siemens, Dassault Systèmes)
- Experience in robotics, mechanical design, or hardware product development
- Scripting/automation experience (Python, PowerShell, VBScript)
- Experience integrating CAD tools into automated workflows (e.g., CI/CD)
- Knowledge of PLM customizations or API use (e.g., Windchill)

What you can look forward to

- Become part of an agile company, actively shape topics and benefit from flat hierarchies in a highly motivated team
- Enjoy an attractive salary, flexible working hours and 25 days of vacation
- Collaboration on highly innovative humanoid robotics systems
- Excellent location in Zurich Seefeld
- New and state-of-the-art office space and workstations
- The freedom to contribute your own ideas and drive them forward
- Celebrate successes together with company events
- Take advantage of our corporate benefits program

- And even more fun with great colleagues

[Apply](#)

We are looking forward to meeting you and shaping the future of robotics together. Are you in?

Couldn't find a suitable position? Please send us an unsolicited application.

We are always looking for passionate tech enthusiasts to help us revolutionize the world of robotics!
