

Welcome to **NEURA Robotics**, the innovator of the robotics world. Our goal is to equip collaborative robots with groundbreaking cognitive capabilities to enable safe and intuitive collaboration with humans. Under the leadership of founder David Reger, we have spent the first years of **NEURA Robotics** laying the foundations for humans and robots to work hand in hand.

"We serve humanity" is not just a motto, but our mission. Become part of our ambitious, international company and shape the future of robotics with us.

Welcome to **NEURA Robotics** - where innovation meets team spirit.

Your mission & challenges

- Consulting, solution-oriented design, and optimization of business processes in Business Central across all relevant modules
- Support for international rollouts and multi-company setups, including localization and country-specific requirements
- Performing fit-gap analyses and deriving functional and technical requirements for implementations, rollouts, and system enhancements
- Configuration and customization of Business Central, including workflows, roles, function settings, document layouts, and extension logic
- 2nd/3rd level support for complex issues

- Creation of solution concepts and specifications for further developments, as well as close cooperation with internal and external BC developers
- Planning and conducting workshops with specialist departments, key users, and management to record processes and define solutions
- Supporting data migrations, defining migration rules, and performing test imports.
- Conducting and managing tests, documenting test cases, and supporting specialist departments until acceptance
- Supporting go-lives, including cutover planning, hypercare, and stabilization of the solution.
- Creating documentation, training materials, and training courses for users, key users, and support teams
- Working closely with the ERP team, BC support specialists, business analysts, and external implementation partners to ensure a high-performance BC system landscape

What we can look forward to

- Several years of experience as a BC consultant (in-house or partner)
- Very good knowledge of BC standard and processes in the industrial/manufacturing environment
- Experience with extensions, interfaces, and updates
- Ability to design pragmatic solutions
- Hands-on mentality, not purely a consulting role
- Confident in dealing with MSPs and specialist departments
- Good written and spoken German and English skills

What you can look forward to

- Become part of an agile company, actively shape topics and benefit from flat hierarchies in a highly motivated team
- Enjoy an attractive salary, flexible working hours and 30 days of vacation
- The freedom to contribute your own ideas and drive them forward
- Celebrate successes together with company events
- Take advantage of our corporate benefits program
- And even more fun with great colleagues
