

Welcome to **NEURA Robotics**, the innovator of the robotics world. Our goal is to equip collaborative robots with groundbreaking cognitive capabilities to enable safe and intuitive collaboration with humans. Under the leadership of founder David Reger, we have spent the first years of **NEURA Robotics** laying the foundations for humans and robots to work hand in hand.

"We serve humanity" is not just a motto, but our mission. Become part of our ambitious, international company and shape the future of robotics with us.

Welcome to **NEURA Robotics** - where innovation meets team spirit.

Your mission & challenges

Develop Robotics Python Applications

- Design and implement advanced Python applications
- Work closely with our software development teams to integrate and fine-tune robotic functionalities

Solution Development, Testing & System Design

- Construct and design complete robot-based applications — from end effectors to full integrated systems
- Develop and configure solutions that include robots, cameras, conveyors, PLCs, and other automation hardware

- Conduct real-world testing to validate performance, reliability, and usability
- Spend approximately 20% of your time at customer sites to test and implement applications in real-world environments
- Troubleshoot and continuously optimize solutions for improved efficiency and scalability

Market Analysis & Requirements Gathering

- Perform detailed market analysis to uncover automation needs and use cases
- Translate insights into clear, actionable technical requirements for our development teams

What we can look forward to

You are a technology enthusiast who wants to change the world for the better. You are passionate about your work, driven by a problem-solving mentality and have the following skills:

- Bachelor's degree in Robotics, Engineering, Computer Science, or a related field
- Strong proficiency in Python programming
- Hands-on experience with computer vision is a big plus
- Solid understanding of robotics systems, PLCs, and automation technologies
- Experience in system-level design of robotic applications is highly desirable
- Ability to analyze market trends and translate them into actionable requirements
- Strong communication skills, with the ability to collaborate effectively with cross-functional teams and customers
- Excellent problem-solving skills, attention to detail, and adaptability in dynamic environments
- You have a perfect command of the English language and, best of all, speak German well

What you can look forward to

- Become part of an agile company, actively shape topics and benefit from flat hierarchies in a highly motivated team
- Enjoy an attractive salary, flexible working hours and 30 days of vacation
- The freedom to contribute your own ideas and drive them forward

- Celebrate successes together with company events
- Take advantage of our corporate benefits program
- And even more fun with great colleagues

[Apply](#)

We are looking forward to meeting you and shaping the future of robotics together. Are you in?

Couldn't find a suitable position? Please send us an unsolicited application.

We are always looking for passionate tech enthusiasts to help us revolutionize the world of robotics!
