

Welcome to **NEURA Robotics**, the innovator of the robotics world. Our goal is to equip collaborative robots with groundbreaking cognitive capabilities to enable safe and intuitive collaboration with humans. Under the leadership of founder David Reger, we have spent the first years of **NEURA Robotics** laying the foundations for humans and robots to work hand in hand.

"**We serve humanity**" is not just a motto, but our mission. Become part of our ambitious, international company and shape the future of robotics with us.

Welcome to **NEURA Robotics** - where innovation meets team spirit.

Your mission & challenges

In this role, you will independently deliver programming-focused training sessions and support users in building real applications using Neura.py. You will guide trainees through hands-on programming workflows, external device integration, and demo setup, helping them move from basic usage to applied development.

You will contribute to the creation of structured training materials and support customers and internal users during practical sessions, ensuring they can confidently develop and test applications with Neura robots and connected devices.

Your main tasks include:

- Deliver and implementation of advanced Python training sessions, covering core concepts, scripting workflows, and best practices.

- Provide hands-on support and during programming trainings and practical exercises.
- Conduct external device training, including integration and usage of grippers, cameras, microphones, and related peripherals.
- Create and maintain Neura.py training documentation and materials, such as guides, examples, and exercises.
- Set up and maintain demo applications and training demos for programming and device integration use cases.
- Support trainees during application development, debugging, and testing.
- Update training content in alignment with product updates, Academy standards, and feedback from training sessions.

What we can look forward to

- Bachelor's or Master's degree in Computer Science, Engineering, Robotics, Automation, or a related technical field, or equivalent practical experience.
- Practical experience with Python programming/ C++
- Experience integrating external devices such as grippers, cameras, or sensors.
- Basic understanding of robotic application workflows and debugging.
- Ability to explain programming concepts in a clear and structured manner.
- Good communication and presentation skills.
- A structured, solution-oriented mindset and confidence in hands-on technical support.
- Fluent in German and English.

What you can look forward to

- Become part of an agile company, actively shape topics and benefit from flat hierarchies in a highly motivated team
- Enjoy an attractive salary, flexible working hours and 30 days of vacation
- The freedom to contribute your own ideas and drive them forward
- Celebrate successes together with company events
- Take advantage of our corporate benefits program
- And even more fun with great colleagues

Apply

We are looking forward to meeting you and shaping the future of robotics together. Are you in?

Couldn't find a suitable position? Please send us an unsolicited application.

We are always looking for passionate tech enthusiasts to help us revolutionize the world of robotics!
