

Welcome to **NEURA Robotics**, the innovator of the robotics world. Our goal is to equip collaborative robots with groundbreaking cognitive capabilities to enable safe and intuitive collaboration with humans. Under the leadership of founder David Reger, we have spent the first years of **NEURA Robotics** laying the foundations for humans and robots to work hand in hand.

"**We serve humanity**" is not just a motto, but our mission. Become part of our ambitious, international company and shape the future of robotics with us.

Welcome to **NEURA Robotics** - where innovation meets team spirit.

Your mission & challenges

- Identify, evaluate, and drive AI use cases across departments – from initial idea to productive implementation
- Analyze and optimize end-to-end business processes through the targeted use of AI and automation
- Independently develop prototypes and provide functional guidance for more complex solutions implemented together with the Enterprise Application Team or external partners
- Design and deliver training sessions on the effective use of AI tools
- Establish and manage a network of AI key users within business departments

- Collaborate closely with the Enterprise Application Team to ensure seamless integration of AI functionalities into the existing system landscape (ERP, CRM, Power BI, Jira, etc.)
- Build and maintain a transparent use case backlog, including prioritization and performance tracking
- Contribute to the further development of the company-wide AI strategy and the establishment of internal knowledge-sharing formats

What we can look forward to

- Strong understanding of current GenAI technologies (LLMs, copilots, automation platforms) and their effective application in a business context
- Proven experience in identifying, evaluating, and implementing AI or automation use cases with measurable business impact
- Experience in the area of enterprise applications (ERP, CRM, BI) or business process digitalization, ideally in an industrial environment and in connection with key user concepts
- Experience in designing and delivering training sessions, workshops, or user trainings for audiences with varying levels of technical expertise
- Solid understanding of business processes across multiple departments (e.g., Sales, Finance, Procurement, Production, Logistics, Service)
- Initial hands-on experience in building prototypes using GenAI platforms, Microsoft Power Platform, or comparable low-code/automation tools
- Strong communication and facilitation skills to effectively operate between business units, IT, and the Enterprise Application Team
- Very good German and English skills, both written and spoken

What you can look forward to

- Become part of an agile company, actively shape topics and benefit from flat hierarchies in a highly motivated team
- Enjoy an attractive salary, flexible working hours and 30 days of vacation
- The freedom to contribute your own ideas and drive them forward
- Celebrate successes together with company events
- Take advantage of our corporate benefits program

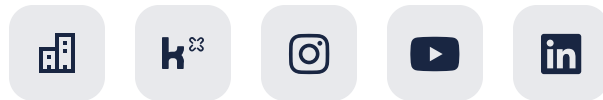

- And even more fun with great colleagues

Apply

We are looking forward to meeting you and shaping the future of robotics together. Are you in?

Couldn't find a suitable position? Please send us an unsolicited application.

We are always looking for passionate tech enthusiasts to help us revolutionize the world of robotics!
