

Welcome to **NEURA Robotics**, the innovator of the robotics world. Our goal is to equip collaborative robots with groundbreaking cognitive capabilities to enable safe and intuitive collaboration with humans. Under the leadership of founder David Reger, we have spent the first years of **NEURA Robotics** laying the foundations for humans and robots to work hand in hand.

"We serve humanity" is not just a motto, but our mission. Become part of our ambitious, international company and shape the future of robotics with us.

Welcome to **NEURA Robotics** - where innovation meets team spirit.

Your mission & challenges

As an IT Support & System Administrator, you will ensure the stability, security, and smooth operation of all IT systems supporting our engineering and robotics development teams. Your responsibilities include:

- Managing and maintaining workstations, servers, networks, and peripheral devices across the company
- Performing hardware and software troubleshooting, diagnosing issues, and implementing sustainable solutions
- Ensuring data security through backup strategies, access control, and system monitoring
- Administering Windows and Linux Server environments, including user management, updates, and configuration
- Installing, updating, and maintaining IT applications, development tools, and engineering software

- Providing hands-on IT support for employees, including CAD users and general IT application support
- Supporting IT infrastructure projects, system upgrades, migrations, and integration of new technologies
- Collaborating closely with engineering and robotics teams to ensure high availability and reliability of development environments

What we can look forward to

Must-have:

- Bachelor's degree in Computer Science, Information Technology, or a related technical field
- Solid understanding of Windows workstations, engineering servers, and peripheral devices
- Knowledge of networking basics (LAN, VPN, DNS, firewall concepts)
- Experience with backup strategies, data security best practices, and version control systems
- Experience in software installation, update, and patch management
- Understanding of Windows & Linux Server environments

Nice-to-have:

- Experience supporting engineering or hardware development teams
- Knowledge of automation or scripting (Python, PowerShell, Bash)
- Familiarity with CI/CD pipelines or automated engineering workflows
- Exposure to CAD/PLM environments (bonus but not required)

What you can look forward to

- Become part of an agile company, actively shape topics and benefit from flat hierarchies in a highly motivated team
- Enjoy an attractive salary, flexible working hours and 25 days of vacation
- Collaboration on highly innovative humanoid robotics systems
- Excellent location in Zurich Seefeld
- New and state-of-the-art office space and workstations

- The freedom to contribute your own ideas and drive them forward
- Celebrate successes together with company events
- Take advantage of our corporate benefits program
- And even more fun with great colleagues

Apply

We are looking forward to meeting you and shaping the future of robotics together. Are you in?

Couldn't find a suitable position? Please send us an unsolicited application.

We are always looking for passionate tech enthusiasts to help us revolutionize the world of robotics!
